Topic: Hierarchical Clustering Algorithm

Aim: Working with Hierarchical Clustering Algorithm

Task: working with supplied test
        working with percentage split
        working with hierarchical clustering

Exercise

1. Import the telco data set into weka

2. Visualize all the attribute

3. Data prepossessing

4. Cluster the data using Simple k mean algorithm (cluster mode: percentage split)

5. Interpret the run information

6. Cluster the data using Simple k mean algorithm supplied set test

7. Load the glass.arff file into weka

8. Normalized the attribute value

9. Hierarchical cluster

10. Explain the run information

11. Visualized tree
